

THIS DOCUMENT SHOWS HOW THE FINAL VERSION OF 310 CMR 7.71, ISSUED ON DECEMBER 29, 2008, DIFFERS FROM THE DRAFT VERSION THAT WAS DISCUSSED AT THE STAKEHOLDER MEETING ON DECEMBER 9TH, 2008.

EMERGENCY REGULATION FOR GREENHOUSE GAS REPORTING

7.71: Reporting of Greenhouse Gas Emissions to a Regional Registry

(1) Purpose The purpose of this regulation is to implement the reporting and verification requirement for statewide greenhouse gas emissions and to monitor and ensure compliance with the reporting provisions of chapter 21N of the Massachusetts General Laws, the Climate Protection and Green Economy Act, section 6 of Chapter 298 of the Acts of 2008.

(2) Definitions The definitions in 310 CMR 7.00: *Definitions* apply to 310 CMR 7.71. The following additional terms have the following meanings when they appear in 310 CMR 7.71. Where a term defined in 310 CMR 7.00: *Definitions* also appears in 310 CMR 7.71, the definition in 310 CMR 7.71 is applicable for the purpose of this regulation.

Carbon dioxide equivalent means the amount of carbon dioxide by weight that would produce the same amount of global warming impact as a given weight of another greenhouse gas, based on the best available science, including from the Intergovernmental Panel on Climate Change.

Direct emissions means emissions from sources that are owned or operated, in whole or in part, by an entity or facility including, but not limited to, emissions from factory stacks, manufacturing processes and vents, and company owned or company leased motor vehicles, fugitive emissions, and other process emissions.

Direct stack emissions means direct emissions, as defined in 310 CMR 7.71(2), excluding emissions from motor vehicles.

Entity means a person that owns or operates, in whole or in part, a source of greenhouse gas emissions from a generator of electricity or a commercial or industrial site including, but not limited to, a transportation fleet.

Facility means a building, structure or installation located on contiguous or adjacent properties of an entity.

General Reporting Protocol means version 1.1 of The Climate Registry's General Reporting Protocol, dated May 2008 and the associated list of clarifications and corrections, dated November 24, 2008.

Greenhouse gas means any chemical or physical substance that is emitted into the air and that the department may reasonably anticipate will cause or contribute to climate change including, but not limited to, carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons and sulfur hexafluoride.

Motor vehicle means any equipment or mechanical device propelled primarily on land by power other than muscular power that is designed or intended primarily for operation on public roadways.

The registry means a regional greenhouse gas registry and reporting system for greenhouse gas emission sources.

Short ton means 2000 pounds or 0.9072 metric tons.

(3) Applicability

(a) Any person owning, operating, or controlling a facility is subject to the requirements of 310 CMR 7.71 if said facility:

1. is required to report air emissions data to the Department pursuant to 310 CMR 7.00: Appendix C and had stationary emissions sources that emitted greenhouse gases during the previous calendar year; or
2. has one or more stationary emissions sources that collectively emitted greenhouse gases in excess of 5,000 short tons of greenhouse gases in carbon dioxide equivalents during the previous calendar year. In determining whether a facility has one or more stationary emissions sources that collectively emit greenhouse gases in excess of 5,000 short tons, all direct stack emissions from all stationary emissions units and processes at the facility shall be included.

(b) Reserved

Deleted: ¶

[*Note to reviewers: Definitions marked with an asterisk are taken verbatim from the Climate Protection and Green Economy Act.]*

Deleted: .

(4) Registration By April 15, 2009, any person owning, operating or controlling a facility that:

- 1) combusted any combination of solid, liquid, and gaseous fossil fuels that resulted in direct stack emissions of more than 5,000 short tons of carbon dioxide emissions during 2008; or 2) reported air emissions pursuant to 310 CMR 7.00: Appendix C and combusted any quantity of any fossil fuel that resulted in direct stack emissions of carbon dioxide during 2008, shall register with the Department using a form provided by the Department.

Deleted: . [Note to reviewers: Reserved for possible provisions allowing MassDEP to waive the requirement to report emissions for a specific category of sources if adequate quantification methodologies do not exist.]

(5) Annual Reporting

(a) Deadlines and General Reporting Requirements

1. Sources that are Required to Report Air Emissions Data Pursuant to 310 CMR 7.00: Appendix C

a. By April 15, 2010, and April 15 of each year thereafter, any person owning, operating or controlling a facility that is required to report air emissions data to the Department pursuant to 310 CMR 7.00: Appendix C and had stationary emissions sources that collectively emitted greenhouse gases in excess of 5,000 short tons of greenhouse gases in carbon dioxide equivalents during the previous calendar year shall report, certify, and verify direct emissions of greenhouse gases for that year in accordance with 310 CMR 7.71(5).

b. By April 15, 2010, and April 15 of each year thereafter, any person owning, operating or controlling a facility that is required to report air emissions data to the Department pursuant to 310 CMR 7.00: Appendix C and had stationary emissions sources that collectively emitted an amount of greenhouse gases that is less than or equal to 5,000 short tons of greenhouse gases in carbon dioxide equivalents during the previous calendar year shall report, certify, and verify direct stack emissions of greenhouse gases for that year in accordance with 310 CMR 7.71(5).

2. Sources that are not Required to Report Air Emissions Data Pursuant to 310 CMR 7.00: Appendix C By April 15, 2010, and April 15 of each year thereafter, any person owning, operating, or controlling a facility that is not required to report air emissions data to the Department pursuant to 310 CMR

Deleted: [Note to reviewers: The reference to "direct stack emissions" in this provision means that sources that report emissions under 310 CMR 7.00: Appendix C, but do not emit more than 5,000 tons of greenhouse gases, do not need to report emissions from motor vehicles.]

Deleted: .

7.00: Appendix C and had stationary emissions sources that collectively emitted greenhouse gases in excess of 5,000 short tons of greenhouse gases in carbon dioxide equivalents during the previous calendar year shall report, certify, and verify direct emissions of greenhouse gases for that year in accordance with 310 CMR 7.71(5).

Deleted: stack

(b) Motor Vehicle Emissions

1. Any person required to report direct emissions from a facility pursuant to 310 CMR 7.71(5)(a)1.a. or 2. shall report emissions from motor vehicles that are owned or leased by any such person if said emissions are from motor vehicles whose primary purpose was to support the operations of that facility, or if said emissions are from motor vehicles that were otherwise assigned to that facility.
2. Notwithstanding 310 CMR 7.71(5)(b)1., if the criteria set forth in 310 CMR 7.71(5)(b)1. would result in motor vehicle emissions being reported by more than one facility, then those emissions shall be included in the report of only one of those facilities with which the motor vehicle is associated.

(c) Greenhouse gas emissions shall be reported in accordance with all applicable requirements of the General Reporting Protocol.

Formatted: Bullets and Numbering

(d) Greenhouse gas emissions shall be reported electronically to the Department in a format that can be accommodated by the registry.

Deleted: [Note to reviewers: The Department will provide additional guidance explaining how to use the General Reporting Protocol to comply with this regulation. The inclusion of the phrase "all applicable requirements" in this provision is intended to acknowledge that some provisions of the General Reporting Protocol, such as provisions related to financial control, may not be relevant to this regulation.]

(e) If required by the registry or the Department, reporters shall report emissions in metric tons. One metric ton equals 1.102 short tons.

(f) A facility-specific report submitted in accordance with 310 CMR 7.71 shall be considered to constitute a complete report, regardless of how the General Reporting Protocol defines or uses the word "entity" to specify organizational boundaries.

Deleted: [Note to reviewers: The Department will provide additional guidance explaining how to report and electronic reporting will be required.]

(g) Notwithstanding any contradictory provisions in the General Reporting Protocol, all stationary emission units and processes at the facility shall be included in the report.

Deleted:

(h) Notwithstanding the inclusion of gases other than carbon dioxide in the definition of greenhouse gases, and notwithstanding any contradictory requirements contained in the General Reporting Protocol, for emissions that occur during calendar year 2009, only emissions of carbon dioxide that result from combustion of fuels shall be reported.

Deleted: [NOTE to reviewers: For facilities that are also required to report pursuant to 310 CMR 7.12, stationary units that are subject to reporting requirements under 310 CMR 7.71 are the same stationary units that are subject to 310 CMR 7.12.)]

(i) Notwithstanding the inclusion of any gas that the department may reasonably anticipate will cause or contribute to climate change in the definition of greenhouse gases, reporting of emissions of gases other than carbon dioxide, methane, nitrous oxide, hydrofluorocarbons, perfluorocarbons and sulfur hexafluoride is not required.
